Inhibition of semicarbazide-sensitive amine oxidase by tyramine derivatives. Semicarbazide-sensitive amine oxidase (SSAO) is an important enzyme that inactivates biogenic amines and modulates the cardiovascular function. The activity of purified rabbit SSAO was investigated with tyramine derivatives. Competitive inhibition studies with various tyramine analogues indicate that tyramine analogues with two aromatic rings at the end of the side chain could be the substrates of SSAO and inhibition occurs by a non-steroidal mechanism. The compounds acted as mixed inhibitors, with K_i values of 3.4 to 2,769 μM . The following is a guest post from Art Brown, principal at Art Brown Engagements. All around the world, in different ways, authors are writing memoirs, essays, and articles about their work. In the Southern United States,
